Popcorn Shrimp & Fish Combo .....	4.95
Corn Dog .....	3.75
Burger .....	4.75
Add Cheese .....	30¢
Pizza .....	3.95
All above meals served with French Fries and complimentary applesauce side upon request.	
Salad Bar .....	2.95
Side Applesauce .....	95¢

Oyster Trailblazers & the Oyster Trail  
 Did you know more than 80% of the World's Oyster Reefs have been lost and the northern Gulf of Mexico is one of the last places on Earth where restoration efforts can be successful. The scientist and volunteers of the Oyster Trail are working hard to restore our reef. Learn facts of Oysters and why they are so important to our environment and our bellies.

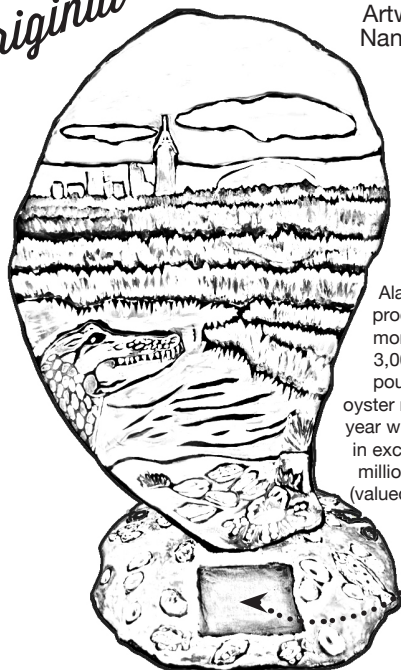

## Mobile Causeway's First Oyster Trail Sculpture Installation

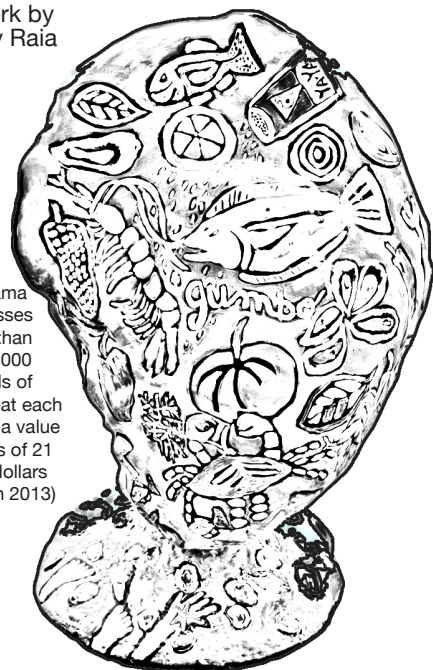

Sponsored by the Original Oyster House

*Original*

Artwork by  
Nancy Raia

Alabama processes more than 3,000,000 pounds of oyster meat each year with a value in excess of 21 million dollars (valued in 2013)

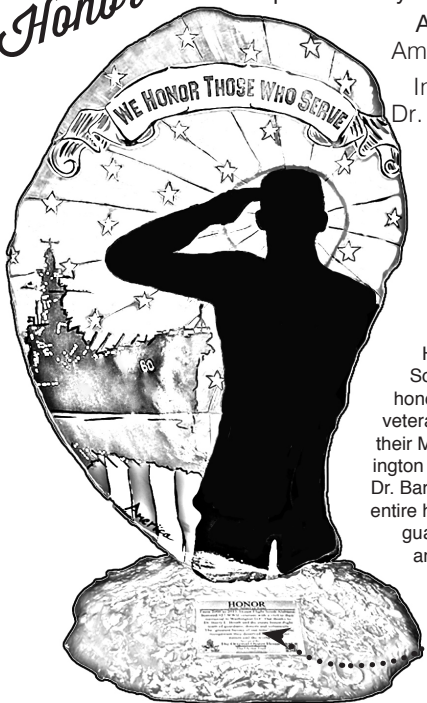

## Gulf Shore's Oyster Trail Sculpture

Sponsored by the Original Oyster House

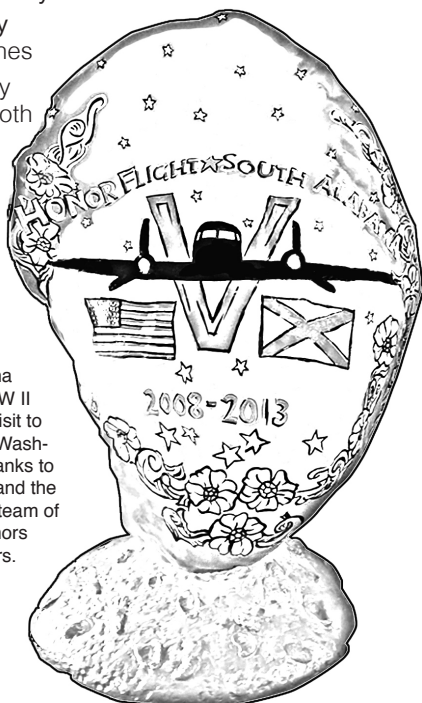

*Honor*

Artwork by  
Ameri'ca Jones

Inspired by  
Dr. Barry Booth

From 2008 thru 2013 Honor Flight South Alabama honored 957 WW II veterans with a visit to their Memorial in Washington DC. Our thanks to Dr. Barry L Booth and the entire honor-flight team of guardians, donors and volunteers.

Did you see the Life-size Oyster outside? ...and wondered what is that? The Oyster Sculpture belongs to the Oyster Trail, a fun, educational, scavenger treasure hunt that benefits restoration efforts of the all-volunteer Oyster Gardeners, Auburn University Marine Extension and Research Center, The downtown Mobile Alliance, the Mobile Arts Council, the Mississippi-Alabama Sea Grant Consortium and the Alabama Cooperative Extension System. Each oyster has a fact plaque that includes important information about the oyster's ecological and economic benefit to Mobile Bay and can be found along the street, within parks, in lobbies, restaurants, the airport, etc. An Oyster Trail Map is available to help you find all the sculptures and win prizes.

Did you know Oysters-

- Clean our waters. An adult oyster can filter a whopping 20 gallons of water per day! 1,000 oysters can together filter the entire volume of your average swimming pool, about 20,000 gallons. After years of decline from disease, overharvest, and predators, the impact is daunting.
- Protect our shorelines from erosion and provide a home for all kinds of aquatic life. The Oyster reef spans miles along the shoreline and helps decrease the impact of wave erosion and tidal surge.
- Feed us with some of the tastiest and most sought after cuisine while providing huge nutritional benefits. We love our oysters fire-grilled, fried or raw and Alabama actually processes more oysters than other states. That's saying something considering our shoreline is only around 60-miles long. Oysters are the highest in zinc which helps our body maintain a healthy immune system.
